Capital Is Power

"Whoever has a sixpence is sovereign over all men to the extent of that sixpence; commands cooks to feed him, philosophers to teach him, kings to guard over him—to the extent of that sixpence."—Carlyle.

A bank balance is stored-up power, strength, resource; it gives confidence, security, protection as nothing else does.

Power begins when Saving begins.

McCORRICK & CO. BANKERS

WHICH IS WHICH

Few men outside of the automobile industry can boast of the ability to identify each of the various types of cars that are seen on the street every day. It would require a school course to be-

Ask the average person the difference between the coupe and the couplet or between the touring car and the salon touring car. He probably could not tell you. Six or eight years ago the limited number of types were easily picked out and named, but there are too many now.

To aid in the education of the public in this matter and to standardize the types for the convenience of the dealers and manufacturers, as well as for the buyers, the Nomenclature Division of Automobile Engineers has settled upon definitions for each type as follows:

Roadster—An open car seating two or three. It may have additional seats on running boards or in rear deck.

Couplet—Seats two or three. It has a folding top and full-height doors with disappearing panels of glass.

Coupe—An inside operated, enclosed car seating two or three. A fourth seat facing backward is sometimes added.

Convertible Coupe—A roadster provided with a detachable coupe top.

Clover Leaf—An open car seating three or four. The rear seat is close to the divided front seat and entrance is only through doors in front of the front seat.

Touring Car—An open car seating four or more with direct entrance to tonneau.

Salon Touring Car—A touring car with passage between front seats, with or without separate entrance to front seats.

Convertible Touring Car—A touring car with folding top and disappearing or removable glass sides.

Sedan—A closed car seating four or more all in one compartment.

Convertible Sedan—A salon car provided with a detachable sedan top.

Open Sedan—A sedan so constructed that the sides can be removed or stowed so as to leave the space entirely clear from the glass front to the back.

Limousine—A closed car seating three to five inside, with driver's seat outside, covered with a roof.

Open Limousine—A touring car with permanent standing top and disappearing or removable glass sides.

Berline—A limousine having the driver's seat entirely inclosed.

Brougham—A limousine with no roof over the driver's seat.

Landaulet—A closed car with folding top, seats for three or more inside and driver's seat outside.—New Haven Chronicle.

BEREAVED

By James Whitcomb Riley.

Let me come in where you sit weeping,—ay,
Let me, who have not any child to die,
Weep with you for the little one whose love
I have known nothing of.

The little arms that slowly, slowly loosed
Their pressure round your neck; the hands you
used

To kiss. Such arms—such hands I never knew.
May I not weep with you?

Fain would I be of service—say something,
Between the tears, that would be comforting,—
But ah! so sadder than yourselves am I,
Who have no child to die.

Drama, properly enough, is in the Greek war-theater.—Syracuse Post-Standard.

Cooling the Beer

It is like a canyon waterfall, the beer plung-
ing over highly burnished copper pipes, doz-
ens strung in a line one above the other.

Inside these pipes are currents of cold water
and ammonia forced from the refrigerator
plant, which reduces the temperature of the
beer to from freezing to 40 degrees.

The greatest care is exercised to keep the
cooler pipes absolutely clean, which is a
part of the process of making

American Beauty Beer

The wort, or beer, runs on the outside of
the pipes. While cooling it is necessary
that it come in contact with an abundance of
pure filtered air in order to become charged
with oxygen, necessary to the life of the
yeast. From here the beer runs into fer-
menting vats made of selected oak wood,
where yeast, such as you make bread of, is
added. It takes two weeks for beer to go
through the main fermentation, and during
the process the fermentation is properly
regulated by means of coils through which
brine is circulated.
